Re: Letter of Appreciation

I write to express our thanks and appreciation on the coming of the solar bulbs to our school on behalf of the school and the community. These bulbs came at a time when we needed light most. Since they are not only useful to learners but also to the community and teachers within and around the school.

Learners from Secondary Schools come to study in our school. We would like to request the company if possible to send us mor bulbs so that they benefit more learners, not only in our school but also in neighbouring schools.

Secondly, thank you so much for the support that our learners have received from Barry in terms of school fees. I hope this will not end up here but hope to benefit more in the future if God allows.

Lastly, words alone can not express how much we really appreciated all the services he did for us.

Mary Nyirenda,  
Head teacher  
Mkondezi Model School
